

## **PERFECTION IN MOBILITY: CYBEX CALLISTO OFFERS THREE-IN-ONE FUNCTION FOR BUSY URBAN LIFESTYLES**

The CYBEX Callisto 3-in-1 system is ideal for modern parents who don't want to sacrifice style, travel or independence. The multi-talented Callisto offers one chassis with three possibilities: city pram, travel system with the CYBEX Aton infant carrier/car seat and luxury stroller.

With lightweight aluminum rims, unique rotational suspension that provides extra comfort, and a height-adjustable handlebar, the Callisto encompasses the core principles at CYBEX: safety, design, and functionality. Martin Pos, Chairman and Founder of CYBEX, explains, "We developed the Callisto with busy parents in mind. A stylish yet highly functional and safe 3-in-1 system the Callisto effortlessly covers the early stages of a child's life, from birth to taking those first steps and beyond, giving parents an advantage in mobility while preserving their lifestyle."

The Callisto converts into a stylish city pram with the durable Callisto carry cot whose aluminum frame is effortlessly attached and detached using easy-snap adaptors. True to CYBEX's superior functionality, the carry cot is also useful as a carrying device and a travel bed. When used in conjunction with the award-winning infant carrier/car seat Aton, the Callisto becomes an indispensable travel system for the busy city lifestyle or families on the go. Lightweight and roomy, the Aton features an integrated foldaway canopy and a removable inlay to accommodate a growing child. When junior becomes a toddler, the CYBEX Callisto ultimately transforms into a luxury stroller again combining functionality and design to meet the needs of modern parents. The extra large individually adjustable sun canopy with UVP50+ protection, central one-pull harness system, four-position one-hand recliner and spacious shopping basket fused with the Callisto's overall agility and simplicity make the luxury stroller an essential accessory for urban parents.

The CYBEX Aton infant carrier/car seat is easily transferred from the Callisto to the car with the Aton base unit. The durable, lightweight Aton base offers a quick, simple and secure installation using either LATCH or vehicle belts. The Aton base boasts an ingenious belt tensioner, allowing for a tight installation without any physical strength or struggle. For further peace of mind the belt tensioner is then paired with a leveling foot ensuring the seat is reclined at the right angle along with a unique indicator button confirming that the infant carrier has been properly secured to the base.

The CYBEX Callisto 3-in-1 travel system answers the call of a growing modern family while maintaining high standards of style and functionality. As a globally renowned brand recognized for its revolutionary design, innovative technology, superior safety features and flawless functionality, CYBEX is committed to developing products that are as enriching as the families who use them.

###
